

**PDF Software Stamp Problem (posted 01/29/07):**

If you are using a temporary/ trial version of PDF software, please be sure to view your documents prior to filing your documents on CM/ECF. Some temporary and trial versions of PDF generating software programs will place an electronic stamp on each page of the document until you register or purchase the software. You may be required to refile your document if a PDF stamp appears on the document.
