

# Multiple Part Motions

If filing a multi-part motion, be sure to select all of the motions from the drop down menu. Use the "control" (i.e., "ctrl") key on the keyboard to select multiple motions from the list (e.g., if filing a motion for a protective order and to compel response to discovery requests - click "protective order," then hold down the "ctrl" key and click "compel" in the drop down menu to select both motions).
